

I CALL YOUR NAME

D D Em11 0 2 2 0 3 3 Em D D A A G A G A

All through the night *D Bm*
The morning the same as the evening *G Em*
Day after day the wind will *Bm A*
These feelings leave me
I've been lonely through my life
I know it ain't right
I'm sure we were made for each other
These feelings remain
How can I go on without you
Lonely through my life
And this go on forever
Must this go on forever

I call your Name I call your name
But still I get no answer And still I've get no answer
In the shadows of night
That somehow brought us together
We only kissed once
One kiss that made me forever
Lonely through my life

You know I've got my pride
But then why can't I help it showed me
As time passes by
I keep awaiting for you to take notice
Lonely through my life
Will I wait how much longer
Should I wait how much longer

I call your Name I call your name
While I wait how much longer Should I wait how much longer
I called your Name I called your name
But still I get no answer Must I wait how much longer
I call your Name I call your name
And still I've get no answer Should I wait how much longer
